*The (intention) of Chokmah is concerned with the influx of Cosmic energy. It is formless, being the pure impulse of dynamic creation: and being formless, the creation it gives rise to can assume any and every form; hence the possibility of sublimating creative force from its purely Priapic aspect.*

### On the Tetragrammatron

...In the old Qabalistic Tradition, the Divine Name was only passed on once in seven years from Master to disciple., "mouth to ear". At the Temple the High Priest alone was empowered to "speak" the Name once a year when he entered the otherwise silent Holy of Holies which no other mortal might penetrate. Doubtless it was fully realized that the Tetragram used on such occasions was only a human substitute for the "Lost Word" which once recovered would restore mankind to God-like status. Possibly the sound of this conclusive Word is not unlike an atomic explosion.

YHWH is the root of Qabalistic Wisdom.
